

- Bottles produced in HDPE using injection blow molding for superior visual quality and dimensional accuracy;
- Available range: 12ml, 20ml and 30ml – other capacities under development;
- Neck finish according to dosage device manufacturer;
- Full batch documentation for each production order, with traceability records of raw materials and products;
- Statistical batch-control and online checking during the production process supported by vision-measuring equipment;
- Raw materials according to the European Pharmacopeia;
- Produced and sealed in ISO Class 7 cleanroom with laminar flow ISO Class 5 according to ISO 14644;
- Packaging process according to ISO 11607-2;
- Sterilization outsourcing for gamma irradiation or ETO process is available and performed according to validated procedure.

We are certified to ISO 9001:2008 and ISO 15378:2011 standards, and all our operation is compliant with current GMP requirements concerning pharmaceutical primary packaging.
